

Membership Website for a training course with OptimizePress and Wishlist

Job Description

Hello,

The job is for setting a membership area with OptimizePress, and Wishlist Member to set the membership rights. The idea, is to set up a training course, with videos.

There is 12 Module, every module has a special icon. The first 10 Modules are the training course, and 2 others modules are bonuses, and must be activated only after 30 days of membership.

I will test the website like that, and with every module activated every week. So please when we work on it, I'd like to have the option to do that in a few months.

- It has to respect the layout of the launch funnel.
- It's needed to set up the payment option : With paypal (and credit card), and by check. When the payment is received by paypal (and credit card), the member can access right now to the course. And when it's by check, I will activate it myself (Please tell me how to do it ?).
- And in the payment, another option to pay in 3 times. Payment would be cheaper in a one time payment, than the 3 times payment. (For the examples, the one time payment would be 497, and the 3 times payment would be 197 for every payment)
- A confirmation page after the payment (The one for the paypal payment will be different from the paycheck one)
- Every module has an introduction video before the course, and in that introduction, people has to download an ebook course, and the exercise sheets (in PDF too). In every first video of the module.
- A page for the faq
- A page for the contact

Here is the videos of every module (PD : WITHOUT THE INTRODUCTION VIDEO OF EVERY MODULE. SO IT WOULD BE FOR EXAMPLE MODULE 1 : 7+1 Videos)

Module 1 : 7 Videos

Module 2 : 10 Videos

Module 3 : 7 Videos

Module 4 : 7 Videos

Module 5 : 12 Videos

Module 6 : 7 Videos

Module 7 : 4 Videos

Module 8 : 5 Videos

Module 9 : 5 Videos

Module 10 : 6 Videos

Module 11 : 5 Videos

Module 12 : 6 Videos

I'll take care of putting the title and the description of every video.

- It's also required to integrate the list with aweber, so the first lead list in the launch funnel, after, the client list (after they buy the product)
- For the design, I will send some good examples, and a draft of my creation !

Note : In the design, I put a sample of how videos menu on the left, but I missed to put the "Introduction" video.

Thanks a lot !

Skills: paypal, video, design

Skills Required

aweber
